132-34	EME-ESGS-7-EME-SLP1-24999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG External Media Edition. CMG Shield License (per device). Licenses: 10,000 - 24,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$5.25	\$4.58

132-34	EME-ESGS-7-EME-SLP1-25000	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG External Media Edition. CMG Shield License (per device). Licenses: 25,000+ [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$4.00	\$3.48
132-34	EE-ESGS-7-EE-SLP1-99999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Shield License (per device). Licenses: 50,000 - 99,999[Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$5.50	\$4.37
132-34	EE-ESGS-7-EE-SLP1-9999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Shield License (per device). Licenses: 5,000 - 9,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$13.00	\$10.35
132-34	EE-ESGS-7-EE-SLP1-999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Shield License (per device). Licenses: 0-999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$18.00	\$14.33
132-34	EE-ESGS-7-EE-SLP1-49999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Shield License (per device). Licenses: 25,000 - 49,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$8.00	\$6.37
132-34	EE-ESGS-7-EE-SLP1-4999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Shield License (per device). Licenses: 1,000 - 4,999[Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$15.50	\$12.33
132-34	EE-ESGS-7-EE-SLP1-24999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Shield License (per device). Licenses: 10,000 - 24,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$10.50	\$8.36

132-34	EE-ESGS-7-EE-SLP1-10000	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Shield License (per device). Licenses: 100,000+ [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$4.00	\$3.18
132-34	EE-ESGS-7-EE-OTASC1-99999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Over the Air Synch Control License (per device). Licenses: 50,000 - 99,999[Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$0.50	\$0.40
132-34	EE-ESGS-7-EE-OTASC1-9999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Over the Air Synch Control License (per device). Licenses: 5,000 - 9,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$2.00	\$1.59
132-34	EE-ESGS-7-EE-OTASC1-999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Over the Air Synch Control License (per device). Licenses: 0-999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$3.00	\$2.40
132-34	EE-ESGS-7-EE-OTASC1-49999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Over the Air Synch Control License (per device). Licenses: 25,000 - 49,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$1.00	\$0.81
132-34	EE-ESGS-7-EE-OTASC1-4999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Over the Air Synch Control License (per device). Licenses: 1,000 - 4,999[Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$2.50	\$1.99

132-34	EE-ESGS-7-EE-OTASC1-24999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Over the Air Synch Control License (per device). Licenses: 10,000 - 24,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$1.50	\$1.19
132-34	EE-ESGS-7-EE-OTASC1-100000	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. CMG Over the Air Synch Control License (per device). Licenses: 100,000+ [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$0.50	\$0.40
132-34	EE-ESGS-7-EE-GKP1-99999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per desktop). Users: 50,000 - 99,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$0.50	\$0.40
132-34	EE-ESGS-7-EE-GKP1-9999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per desktop). Licenses: 5,000 - 9,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$2.00	\$1.59
132-34	EE-ESGS-7-EE-GKP1-999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per desktop). Licenses: 0-999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$3.00	\$2.40
132-34	EE-ESGS-7-EE-GKP1-49999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per desktop). Licenses: 25,000 - 49,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$1.00	\$0.81

132-34	EE-ESGS-7-EE-GKP1-4999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per desktop). Licenses: 1,000 - 4,999 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$2.50	\$1.99
132-34	EE-ESGS-7-EE-GKP1-24999	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per desktop). Licenses: 10,000 - 24,999[Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$1.50	\$1.19
132-34	EE-ESGS-7-EE-GKP1-100000	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per desktop). Users: 100,000+ [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$0.50	\$0.40
132-34	EE-ESGS-7-EE-ES-25000	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Enterprise Server (up to 25,000 users). [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$8,750.00	\$6,962.53
132-34	EE-ESGS-732310	10 Call Package. Single Incident call in off hours support outside of standard support hours. [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months. All maintenance fees are non-refundable.]	\$1,250.00	\$1,088.16

132-51	Consultant Software Category I	<p>Minimum/General Experience: Acts independently on the most specialized phases of system design, implementation, analysis and programming of enterprise products. Leads and participates in major system studies and implementations of enterprise products. Investigates leading edge information technologies and applies it to the client environment. Functions as the technical expert during product presentations to clients. Possesses industry-leading expertise in the implementation of enterprise products.</p> <p>Functional Responsibility: Able to provide consultative Professional Services support at the very highest levels of the enterprise. Able to provide assistance and guidance to less experienced technical staff.</p> <p>Minimum Education/Specific Experience: Minimum of Bachelor's Degree and six (6) years of enterprise application technology specific consultative expertise.</p>	\$250.00	\$233.75
132-33	EEGKP2-1	Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per user). Licenses quantity 1 (User Pricing is not retroactive)	\$13.00	\$12.01
132-34	ES-M003-G-EE-GKP2-1	Standard Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per User). Users: quantity 1 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$2.34	\$2.17
132-34	EE-ESGS-7-EE-GKP2-1	Gold Level Maintenance for Credant Technologies CMG Pricing. CMG Enterprise Edition. Gatekeeper License (per user). Licenses: quantity 1 [Maintenance is a support fee and is required. Maintenance begins on the date of invoice and continues for 12 months]	\$3.77	\$3.48

132-51	Functional Analyst	Responsibilities: Responsible for analysis of hardware, software, and/or communications programs, business processes, and/or functional processes. Defines, designs, and recommends processes and procedures supporting the acquisition and/or implementation of information technology, which support business or other functional processes. Develops documentation supporting analysis and makes recommendations on design, acquisition, or implementation of complex or non-complex IT systems.	\$83.00	\$75.12
132-51	Business Processes Analyst - Sr.	Responsibilities: Performs analysis of functional processes, organizations, and enterprises to identify and develop business process engineering initiatives. Evaluates business processes for efficiency, effectiveness, and improvement. Documents analysis of business processes and recommended improvements. Responsible for process reengineering, facilitation, training and methodology development, and evaluation across all phases of an enterprise or function. May identify best practices, change management, business management techniques, organizational development, activity and data modeling, or IT system development methods and practices.	\$85.00	\$76.66
132-51	Sr. Network Technician	Minimum/General Experience: Able to work independently on basic networking issues such as cable/plant layout and server/desktop installation. Possess working knowledge of at least one Network Operating System, preferably Microsoft NT. Able to work directly with end user customers.	\$86.00	\$77.98

132-51	Project Specialist	<p>Minimum/General Experience: Must be proficient in writing style, punctuation, grammar and format. Must have experience in creating technical documents using appropriate computer based software desktop publishing packages including but not limited to Excel, Adobe PageMaker, Ventura, Quark, etc. Able to train client personnel in subject matter related to information technology. May develop IT course materials. Able to provide support to data processing and service functions including; 1) documenting IT programs and processes;2) processing, collecting, testing, maintaining and distributing program and systems documentation; 3) analyzing software code and anomalies; 4) collecting raw information, preparing flow charts, and coding in program languages and 5) word processing support of technical writers and engineers in the preparation of program documentation.</p> <p>Functional Responsibility: Prepares documentation and reports either in standard textual format and/or using commercial software packages to prepare multi media documents.</p> <p>Minimum Education: Must possess a Bachelor's degree and at least one (1) year experience in technical writing/multi media or specialized training in said field.</p>	\$88.00	\$79.40
132-51	Quality Assurance Manager	<p>Responsibilities: Performs analysis of quality processes. Establishes, implements, and maintains processes for evaluating quality in all aspects of the software development life cycle. Determines the resources needed for a quality assurance or quality control program. Conducts reviews of quality throughout the life cycle of a system or program. Provides daily supervision and direction to staff.</p>	\$89.00	\$80.33

132-51	Sr. Programmer	Responsibilities: May serve as task or project leader. Performs analysis and develops, integrates, and maintains both systems and applications software as required. Performs enterprise or organization-wide planning and design of technical solutions requiring the application of information technology. Performs analysis and validation of IT requirements. Plans and manages efforts within the systems software domain.	\$90.00	\$81.46
132-51	Sr. Information Engineer	Responsibilities: Performs information systems development, systems analysis and design, functional and data requirements analysis, programming, program design and documentation preparation. Implements information engineering projects, systems analysis, design and programming using CASE and IE tools and methods, systems planning, business information planning, and business analysis. Applies, as appropriate, activity and data modeling, transaction flow analysis, internal control and risk analysis and modern business methods and performance measurement techniques. Assists in establishing standards for information systems procedures.	\$90.00	\$81.67
132-51	Configuration Management (CM) - Principal	Responsibilities: Develops, administers and implements CM plans and procedures. Controls configuration baselines and interfaces through engineering change proposal/specification processing. Conducts functional and physical configuration audits and formal qualification reviews. Establishes and maintains CM documentation control systems. Maintains the master records for the establishment and change of configuration baselines, engineering release systems, configuration item development record, and configuration status accounting.	\$91.00	\$82.33

132-51	Sr. Systems Analyst	<p>Responsibilities: Conducts system planning to include requirement definition, implementation planning, and lifecycle cost estimates. Performs analysis or studies enhancing or implementing systems software solutions. Undertakes significant analysis within software programs. Defines, designs and specifies processes and procedures supporting the implementation of information technology, which support business or other functional areas. Develops documentation supporting analysis and makes recommendations on design and implementation of complex IT systems. May serve as task or project leader.</p>	\$93.00	\$84.50
132-51	Information Security Analyst	<p>Responsibilities: Applies an enterprise-wide set of disciplines for program planning, analysis, secure system architecture and design, integration, and security testing across major enterprise segments. Develops information assurance analytical methodologies, approaches, techniques, processes, procedures, and schedules development of sub-systems or small to medium sized systems. Performs enterprise-wide information assurance strategic planning, security policy development and requirements identification. Experience in threat assessment, vulnerability analysis, system testing system testing, enterprise-wide security related countermeasure selection and implementation, security documentation, and system/network risk migration. Responsible for managing security implementation for developing and legacy systems/networks.</p>	\$96.00	\$86.55

132-51	Sr. Database Administrator	Responsibilities: Applies knowledge of computer science concepts and techniques in the design, development, installation, and maintenance of relational databases. Develops and maintains necessary public synonyms, database links, and user access controls. Provides database tuning and monitoring to ensure effective and efficient data access to include comparison of performance ratios, tuning of memory configuration, disk I/O, and application software, design and maintenance of the physical layout of the databases and calculating disk space requirements for database tables and indexes. Responsible for developing project plans, justifications, guidelines, and controls.	\$96.00	\$86.67
--------	----------------------------	---	---------	---------

132-51	Web Designer	Responsibilities: Responsible for the oversight and creation of graphic user interfaces for the internet. Coordinates with application engineers and end users to determine requirements and manages and implements quality control procedures to ensure compliance with requirements. Works closely with application engineers and end users to design effective graphic user interfaces using current developments in web design tools and networking technology.	\$98.00	\$88.84
--------	--------------	---	---------	---------

132-51	Sr. Functional Analyst	Responsibilities: Responsible for analysis of hardware, software, and/or communications programs, business processes, and/or functional processes. Defines, designs, and recommends processes and procedures supporting the implementation of information technology which support business or other functional processes. Develops documentation supporting analysis and makes recommendations on design and implementation of complex IT systems.	\$99.00	\$89.33
132-51	Sr. Programmer Specialist	Responsibilities: May serve as task or project leader. Performs analysis and develops, integrates, and maintains both systems and applications software as required. Performs enterprise or organization-wide planning and design of technical solutions requiring the application of information technology. Performs analysis and validation of IT requirements. Plans and manages efforts within the systems software domain.	\$102.00	\$92.72

132-51	Systems Engineer	<p>Minimum/General Experience: Experienced in assessing requirements for new or modified systems, performing detailed systems design, preparing written specifications, programming and conducting module and integration tests. Able to train client personnel in subject matter related to information technology. May develop IT course materials. Experienced in design and maintenance of database management systems, use of CASE technology and in structured requirements analysis methodologies such as information engineering. Knowledge of MIL-STDs and system development processes. Functional Responsibility: Provides specific technical expertise to the project in all areas of technical implementation. Minimum Education: Possesses a Bachelors Degree in engineering, science or math or equivalent experience and at least four (4) years working experience in this area.</p>	\$105.00	\$94.84
--------	------------------	---	----------	---------

132-51	Intermediate Communications Analyst	Responsibilities: Responsible for supporting the delivery of technical solutions based upon established requirements of enterprise-wide or large scale computer networks. Supports design of computer network architecture. Establishes general LAN.MAN/WAN administration procedures and provides technical leadership in the integration and test of complex large-scale computer integrated networks. Schedules conversions and cut-overs. May oversee network control center.	\$105.00	\$94.84
132-51	Sr. Communications Analyst	Responsibilities: Applies communications/network improvement practices to establish requirements of enterprise-wide or large-scale computer networks. Designs large-scale computer network architecture. Establishes general LAN/MAN/WAN administration procedures and provides technical leadership in the integration and test of complex large-scale computer-integrated networks. Oversees network control center. Supervises maintenance of systems. May supervise communication analysts.	\$106.00	\$96.24

132-51	Business Processes Analyst - Principal	Responsibilities: May serve as task or project leader. Performs analysis of functional processes, organizations, and enterprises to identify and develop business process engineering initiatives. Evaluates business processes for efficiency, effectiveness, and improvement. Documents analysis of business processes and recommends improvements. Provides training and guidance in the implementation of improved processes.	\$111.00	\$100.41
132-51	Sr. Engineer	Minimum/General Experience: Able to plan, design, develop, install, modify, and test networks, application programs and/or computer based systems. Able to translate systems/subsystems designs and detailed designs into fully functioning and architecturally compliant networks, applications or computer based systems. Requires knowledge of servers, workstations, and other programmable systems such as controllers and handheld devices. Provides advice on differing networking implementations and designs. Able to provide problem resolution, compliance testing and design recommendations. Hands on experience with internetworking equipment to include configuration, installation and/or troubleshooting. Also, able to work with senior technical and user staff in a consultative role on their projects. Able to provide assistance and guidance to less experienced contractor technical staff. Functional Responsibility: Provides senior level leadership to the project in all areas of technical implementation. Minimum Education: Has either Bachelors Degree in an engineering discipline or MCSE certification as well as at least six (6) years of experience.	\$125.00	\$113.59

132-51	Principal Information Engineer	<p>Responsibilities: Mentors government task leaders and acts as project manager directing the efforts of other IE Engineers. Has full life-cycle experience and expertise in all areas of the IE Methodology. Applies an enterprise-wide set of disciplines for the management, planning, coordination, analysis, design and construction of information systems on an enterprise-wide basis. Develops analytical and computational techniques and methodology for problem solutions. Has experience with manual and automated tools, such as I-CASE, and is familiar with IDEF 0 process modeling and IDEF 1X data modeling. Plans and manages project schedules, directs the work of other contractors, provides quality assurance reviews and provides consulting services during the planning, analysis, and design phase of information engineering.</p>	\$127.00	\$114.63
132-51	Voice Communications Manager	<p>Responsibilities: Manages a team of voice communications technicians and analysts who maintain and support voice communication systems, including Automated Call Distribution (ACD), Call Management Systems (CMS), and Voice Mail, PBX, CBX. Identifies issues and appropriate courses of action. Researches and oversees implementation of new technologies. Must be familiar with a variety of the field's concepts, practices, and procedures. Knowledgeable in communication protocols and hardware (e.g. Lucent, Siemens, Nortel). Frequently reports to Telecommunications Department Director/Manager.</p>	\$129.00	\$116.93

132-51	Sr. Information Security Analyst	<p>Responsibilities: Applies an enterprise-wide set of disciplines for program planning, analysis, secure system architecture and design, integration, and security testing across major enterprise segments. Develops information assurance analytical methodologies, approaches, techniques, processes, procedures, and schedules development of sub-systems or small to medium sized systems. Experience in threat assessment, vulnerability analysis, risk assessment and system/network risk migration. Responsible for managing security implementation for developing and legacy systems/networks.</p>	\$132.00	\$119.97
132-51	Technical Project Manager	<p>Minimum/General Experience: Qualified in leading the design, development and maintenance of IT projects including developing layout and detailed drawings, preparing written specifications, performing design calculations and developing cost estimates. Able to plan, design, develop, modify, test and support software applications/interfaces as well as translate design and program specifications into functioning software code. Able to coordinate project needs with other design disciplines. Capable of investigating project design alternatives as identified by the Senior Design Engineer. Able to perform research for identification of acceptable materials or equipment. Capable of performing on-site inspections of projects.</p> <p>Functional Responsibility: Acts as the senior technical focal point for all projects within the program responsible for all contractual, staffing, financial, performance and delivery issues.</p> <p>Minimum Education: Possesses a Bachelors Degree in an engineering discipline or four (4) years related work experience in such disciplines as Oracle, C++, PowerBuilder, Visual Basic or similar.</p>	\$135.00	\$122.41

132-51	Principal Systems Architect	<p>Responsibilities: Provides overall technical direction in systems engineering and in the development of information technology architectures for a variety of software and communications programs. Evaluates organizational work and information flows to determine the optimum information technology architecture for the domain or enterprise. Establishes system requirements in the development of enterprise-wide or large-scale information technology programs. Designs software, hardware, and communications to support total requirements and provides required interfaces to other systems, domains, or enterprises. Provides guidance and direction to system architects and software developers.</p>	\$135.00	\$122.44
132-51	Program Manager	<p>Minimum/General Experience: Plans, organizes and directs the efforts of a program team, serves as on-site focal point for technical and administrative matters ensures all data submittals are complete correct and in accordance with contract prior to submittal and tracks financial data of individual tasks. The Project Manager posses significant related management experience.</p> <p>Functional Responsibility: Acts as the senior executive focal points for all projects within the program responsible for all contractual, staffing, financial, performance and delivery issues.</p> <p>Minimum Education: Bachelor's Degree and ten (10) years of experience leading teams or projects.</p>	\$144.00	\$130.13

132-51	Data Communications Manager	<p>Responsibilities: Manages a team of data communication technicians and analysts who maintain and support data communication systems. Ensures that adequate and appropriate planning is provided for remote hardware and communications facilities to develop and implement methodologies for analysis, installation, and support of distributed processing client/server systems. Provides coordination in the analysis, acquisition, and installation of hardware, software, and facilities. Manages the training and efforts of a staff engaged in system and network planning, analysis and monitoring activities. Frequently reports to Telecommunications Department Director/Manager.</p>	\$144.00	\$130.13
132-51	Sr. Systems Engineer	<p>Minimum/General Experience: Experienced in assessing requirements for new or modified systems, performing detailed systems design, preparing written specifications, programming and conducting module and integration tests. Experienced in design and maintenance of database management systems, use of CASE technology and in structured requirements analysis methodologies such as information engineering. Knowledge of MIL-STDs and system development processes. Functional Responsibility: Provides senior level leadership to the project in all areas of technical implementation.</p>	\$150.00	\$135.65

132-51	Sr. Applications Programmer	<p>Minimum/General Experience: Able to plan, design, develop, modify, and test application programs. Able to translate systems/subsystems designs and detailed designs into applications logic. Able to provide advice on differing control systems applications designs and access methods in problem resolution, design, and development situations.</p>	\$167.00	\$151.08
132-51	Sr. Technical Project Lead	<p>Minimum/General Experience: Possesses exceptional expertise in an IT discipline/technology or specific functional area related to IT (environmental compliance for example). Possesses a thorough knowledge of design requirements and operational procedures for IT systems, applications and relational databases. Assists the Program/Project Manager in identifying all required system/software/design changes to be incorporated into project documents as well as configuration management databases.</p> <p>Functional Responsibility: Provides oversight and technical review of project tasks and provides functional analysis in order to achieve optimal design configurations. Has the ability to interpret various regulations, policies and other constraints and assess their impact on project costs.</p> <p>Minimum Education: Possesses either a Bachelor's Degree in an engineering discipline or related area such as mathematics, environmental sciences, statistics etc. Degree requirements can be substituted for seven (7) years-related work experience.</p>	\$182.00	\$165.43

132-51	Sr. Program Manager	<p>Minimum/General Experience: Responsible for integrating multiple IT projects into a coherent overall Program Plan. Ensures that quality assurance and total quality management practices are implemented with regard to the overall contract. Is responsible for the financial accountability of the program/contract. Must possess significant related management experience over multiple projects and at least twelve years of relevant industry experience.</p> <p>Functional Responsibility: Acts as the senior executive focal points for all projects within the program responsible for all contractual, staffing, financial, performance and delivery issues.</p> <p>Minimum Education: Bachelor's Degree and twelve years of experience leading teams or projects.</p>	\$199.00	\$180.46
132-51	Technical Consultant	<p>Minimum/General Experience: Possesses industry-leading expertise in a technology area such as networking, electronic business or software applications. Specific examples include leading edge expertise with such technology manufacturers such as Netscape, Microsoft, Oracle, Microstrategy, CISCO etc.</p>	\$216.00	\$196.30
132-51	Consultant Software Category III	<p>Minimum/General Experience: Able to plan, design, configure, develop, modify, test and install enterprise applications. Able to provide advice and resolve issues regarding application designs, technical architectures, software interfaces, data conversion, testing, operations and user support.</p>	\$239.00	\$217.22

132-51	Sr. Consultant	Minimum/General Experience: Able to plan, design, configure, develop, modify, test and install enterprise applications such as Oracle, Peoplesoft, BAAN, SAP, Network Management software, Microstrategy and Netscape. Able to translate systems/subsystems designs and detailed designs in to operational systems. Able to provide advice and resolve issues regarding application designs, technical architectures, software interfaces, data conversion, testing, operations and user support.	\$255.00	\$231.60
132-51	Consultant Software Category II	Minimum/General Experience: Able to plan, design, configure, develop, modify, test and install enterprise applications. Able to translate systems/subsystems designs and detailed designs into operational systems. Able to provide advice and resolve issues regarding application designs, technical architectures, software interfaces, data conversion, testing, operations and user support.	\$268.00	\$242.84
132-51	Sr. Information Security Consultant	<p>Responsibilities: Manages the analysis of IA requirements for multi-level security issues. Manages the design, development, engineering, and implementation of solutions to multi-level security requirements. Implementation and development of multi-level security as well as organizing technical information about an organizations goals, existing security products and on-going programs in a multi-level security arena. Performs risk analysis and risk assessments.</p> <p>Requirements: Bachelor's degree with 10 years experience, of which 4 years are in information assurance projects. Master's degree with 2 years experience, of which 1 year is specialized.</p>	\$269.00	\$244.15

132-51	Sr. Technical Consultant	Minimum/General Experience: Acts independently on the most specialized phases of system design, implementation, analysis and programming. Leads and participates in major system studies and implementations. Investigates leading edge information technologies and applies it to the client environment. Functions as the technical expert during product presentations to clients. Possesses industry-leading expertise in a technology area such as networking, electronic business or software applications. Specific examples include leading edge expertise with such technology manufacturers such as Netscape, Microsoft, Oracle, Microstrategy, CISCO etc.	\$460.00	\$417.73
